

## **Gordana Ostojić**

GeoGIS Consultants

### **Bilateral Meetings**

- November 13, 2015 (11:00 am - 01:00 pm)

#### **Description**

GeoGIS Consultants was established in 1997, under the name WGN-World Geodetic Network, as a private-owned company. The company employs 12 experts whose references include domestic and international project activities. Its basic activities comprise: aerial and satellite image processing and production of digital orthophoto maps, GIS design and implementation using ArcInfo methodology. The company team is experienced in digital photogrammetry and remote sensing, more precisely in utilization of aerial and satellite data from various sensor types including LANDSAT, SPOT and IKONOS satellite imagery and its combining with GPS technology.
