- November 13, 2015 (11:00 am - 01:00 pm)

Description

ASI is European system integrator which offers complete ICT solutions to its clients for a rapidly developing telecommunications industry. The Company specializes in integrating solutions that enable network operators to provide multimedia services such as digital TV, Internet and telephony. In today's modern world of ICT technology, ASI offers its clients the best solution for their needs.

We offer wide range of products from the world known manufacturers of IT and telecommunication equipment such as: **ATX, Cabelcon, CommScope, Lica, Netgem, Teleste, Vector, Conax**

Our focus is mainly based in the area of design, development, implementation and integration of communication systems. We are offering variety of services:

Consulting: The choice of technology and equipment based on the customers' needs, development plan and plan of investments should no longer be your concern.

Design: We can provide detailed design for your network or system.

Sales: We offer products from many well-known vendors of equipment and software.

Implementation: Our job is system and product implementation into one functional solution.

Training: We have certified trainers which can help your technicians to upgrade the performance of their every day work.

Maintenance: Onsite and remotely system maintenance.
