

Want to help your clients grow by using mobile apps in their business?

We can help you strategize, prototype, pitch, design and develop your client's next mobile solution

What We Do?

In essence, we help you be more profitable

We do it by creating beautifully designed iOS and Android apps that optimize your clients business processes, help them serve their current customers better and/or attract more customers and sales. The agencies we currently work with, say we make the whole mobile app solution creation process E.L.F. This acronym stands for EASY, LUCRATIVE and FUN.

How We Do It?

We use "The Circle Of Ultimate App Development™" process

To make your clients happy, you expect predictable and reliable quality every single time. We get that. That is why we carefully tested and shaped a proven 5 step development process that can deliver consistent results for you and your clients.

"Don't Tell Me, Show Me!"

See part of the #winning apps we are proud of

BDay App

Always be updated once a friend of yours has birthday. Send happy wishes in different file formats and make someone feel special on their day.

QUEET

Enjoy turning total strangers into friends through 30 seconds video calls and chat rooms. QUEET supports your networking, and boosts communication skills.

OH & S

If safety is a high priority for your business, here's an app that will assure you that everyone has left the building in a case of emergency. Employees do a simple check-in every time they enter the building, and automatically check-out when they leave, which makes it easy to notify everyone who is inside to leave the space, when needed.

TapZ

Simple, yet very fun and addictive game, where the user taps the circle in a given period of time. Subtle, cool animations with background changes depending on the clock, this app is a true enjoyment.

TechExchange

A marketplace where great tech-people meet companies that need their expertise. The app brings this platform to a new level, providing greater support and features for both, the businesses, and the freelancers.

PocketChange

Here is your chance to be part of a better cause, and donate to a charity in a few finger tips. PocketChange lets you support the ones that need it the most, and makes you a better person.

Whos In

Directly invite friends to have some fun time together. Select activity, choose time, send to friend and receive instant response.

Sumo Smash

Fun game where the user helps Sumo Sam to practise for the Sumo Championship, by playing the food that keeps coming at him.

Sittinonmusic

App that allows users to be their own producers. Listen and download beats in different genres and get creative. Write lyrics and sign or rap to the chosen beats.

Companies That Trust Us

We work only with the best clients

Can We Start Building Something For You?

Great! Please share the details below, so we can start our engines

The best way to start things off is by focusing on a pilot project we can do together right away. This will be a perfect opportunity to learn more about your way of doing things and start shaping our future collaboration/partnership.

If you have a project that we can help you with, send us your requirements to lg@3pdevelopment.com or call us today +389 (77) 513 101.
